Full Formative Assessment System

A full formative assessment system is included, whereby students can attempt various kinds of tests and challenges, get instant feedback and have their scores recorded. The teacher can also access this data and use it for assessment and feedback. In addition, the teacher can set tasks on-line, leave comments and request repeats.

Each test provides feedback immediately upon completion. Each question is marked right or wrong, and a score given as a percentage. This score is graded with a colour ranging from red (0%) to green (100%). The test can be taken again but the questions, and therefore answers, will change. See progress topic by topic and in relation to class average and variation.

See the Help section at www.mathsnetalevel.com to see just how easy to use, helpful and empowering the assessment facilities are, and how to get started.

View test results by various groupings, either by student, by class, by module or by specific question. The listing by specific question will, in addition, show marks for each individual part of the test, which lets the teacher identify specific areas that are causing difficulty, and even previous versions.

Simply click to download the data to Excel. See full stats on student use. Check the Redo box to ask the student to redo the task.

**Students’ Comments**

“This site is soooooo helpful and informative, and contributed to me going from a E to a A in my AS Levels.”

“I have been using the interactive AS and A2 website regularly since my C1 exam.”

“The worked exam questions have been extremely helpful and I owe my success to this website.”

“Just want to say what a wonderful job you have done here. It has helped me so much in doing my A Levels, in my first year and doing further maths, got As in January on C1 and C2 and to be honest a lot of this is down to this site as it is so easy to learn from. Anyway thanks again for the amazing site, keep up the good work : )”

“This site has been invaluable to me through previous years of A level and further more important in the next few months.”
